RAL finish is also available.

Strength, style and safety come together with our premium railing systems. Whether for homes, offices or commercial projects. Add a touch of elegance to your interiors and exteriors with our premium railing system. We serve Aluminium railing and stainless steel railing across segments.

**SYSTEM WINDOW
STRUCTURAL GLAZING
CURTAIN GLAZING**

Structural glazing uses high-strength silicone to bond glass to a building's structure for a seamless, frameless look. Curtain glazing (or curtain walls) uses visible aluminum frames (pressure plates/caps) to mechanically secure glass, offering a more modular and cost-effective approach.

System aluminium windows are pre-engineered, factory-made solutions where frames, seals, hardware, and glass are designed to function as a complete, integrated unit. These systems, made of durable aluminum, are widely used in both modern residential and commercial buildings.

ACP CLADDING LOUVERS

ACP (Aluminum Composite Panel) cladding is a durable, lightweight architectural facade system composed of two thin aluminum sheets bonded to a non-aluminum core (polyethylene or fire-retardant material)

Widely used for exterior, interior, and signage, it offers high weather resistance, versatility in colours / textures, and low maintenance. Exterior cladding for commercial and residential buildings.

Thickness: Generally ranges from 3mm to 6mm.
